

Paradox **MetL3™** BowSling

**NEW
FOR 2017**

The MetL3™ sling mount uses our original three-hole threading to secure the strap. No screws to loosen, no tools needed for adjustment. The 180 degree turn in the threading guarantees the strap will not move.

- Ultra-light, one-piece machined aluminum construction.
- High-quality black anodize finish.
- Three mounting position options — standard center hole or choose a left/right offset for greater grip clearance.
- Models to fit all Paradox strap designs — Standard Braided Straps, Elite Braided Straps, Custom Cobra Straps or Spiral Cord Straps.
- The MetL3™ sling models are available only through Paradox Products.
- Minimum Advertised Pricing (MAP) for profitability.
- Designed and manufactured in the U.S.A.
